

Full Stack Developer

Description

We are looking for a Full Stack Developer to produce scalable software solutions. You'll be part of a cross-functional team that's responsible for the full software development life cycle, from conception to deployment.

As a Full Stack Developer, you should be comfortable around both front-end and back-end coding languages, development frameworks and third-party libraries. You should also be a team player with a knack for visual design and utility.

If you're also familiar with Agile methodologies, we'd like to meet you.

Responsibilities

- Developing front end website architecture.
- Developing back-end website applications.
- Creating servers and databases for functionality.
- Ensuring responsiveness of applications.
- Designing and developing APIs.
- Meeting both technical and consumer needs.
- Staying abreast of developments in web applications and programming languages.
- Test software to ensure responsiveness and efficiency.

Skills

- Strong organizational and project management skills.
- Proficiency with fundamental front-end languages such as HTML, CSS, Bootstrap, AJAX and JavaScript/jQuery.
- Proficiency with server-side languages such as Core PHP, CodeIgniter.
- Familiarity with database technology such as MySQL, AWS, S3, RDS Arora.

Sub Skills

- Excellent verbal communication skills.
- Good problem-solving skills.
- Great attention to detail.
- Organizational skills.
- Fast-moving and improving the environment.
- Bachelors/Masters in Computer Science, Engineering or a similar relevant field
